## "TEST 1, 2, 3"

This is a test workbook to ensure you will be able to use the Procreate PDF workbook.

If you've opened this document in a browser or another e-reader, follow the instructions below to test your Procreate PDF capabilities:

- First, make sure you've saved the file to your iPad files - somewhere where you'll remember.
- Next, open Procreate.
- Next, from the Gallery view, select "Import" to open this PDF.
- You should see a little tool pop up at the bottom of the page with two pages shown. This is called Page Assist and allows for PDFs to be viewed in Procreate.

If you aren't able to import this PDF into Procreate, please ensure that your iOS and Procreate version is up to date prior to class.
